

# HOW TO CREATE A WELL-BALANCED JEWELRY SET

You must first determine the main jewelry of your set. All other jewelry to be worn with it should be simple. For example, if you choose a large necklace or one that draws attention, we would suggest discreet earrings or a bracelet. Don't hesitate to opt for another design in order to have a more delicate accessory.

By recapturing a simple and discreet element of the main jewelry, such as the color of the metal, a bead that almost goes unnoticed or a chain link, you can make a connection between both jewelry accessories and obtain a well-balanced set. At first glance, some might think that a jewelry set doesn't fit together, but if you put on your creative eyes, you will see that the set is perfectly harmonized.

Know that you can create several jewelry sets, the main thing is not to wear them all at the same time ! If you put on more than two jewelry accessories, it might be a little too much. In order to lighten even more the look you created, keep some distance between the jewelry you are wearing. For example, wear a necklace and a bracelet or earrings and a bracelet.

Voilà : the key to it all is moderation and simplicity!
